Giuseppe Ronca

Tech Lead at Bitvavo

Haarlem

Riepilogo

I'm a Computer Science addicted with a Bachelor's Degree.
I've 15 years of experience in software development and I usually
spend my time making research and working in the field of IT

I started to work before my university career. I used to study IT since
I was 13 years old.
I've started with Pascal, TCL, C++, MySQL with which I've learnt
the basics of programming languages, database administration and
software architecture.
I wrote my first desktop and server applications for enterprises and
big open source companies in 2007.
Later on, I enrolled at the University of Computer Science in order to
improve my software engineering skills, learn the AGILE framework
as well as improving my skills in UX, Java, and design patterns.
I'm involved as the founder, lead developer and administrator of
various open-source and non-profit communities with
thousands of active users such as AzerothCore
I had an experience as the Manager of my personal organizations
(Hyperweb2, Drassil).
I've organized 15 days of seminars about ReactJS and NodeJS, with
which I've created a team of 6 freelancers, the Red Square team.
We've worked on various enterprise projects for which I played the
role of both PM and Lead Developer.
Currently I'm working for an international company in The
Netherlands to move up with my career in this challenging and
amazing environment.
I always look for perfect, effective and practical solutions to any
potential problem.

Esperienza

Bitvavo
